Ton Units (370 Tons Total)

Reynosa is a mature manufacturing hub on the U.S.-Mexico border with a diversified industrial base and strong talent availability.

With a population of 704,767 (INEGI 2020), the market supports scalable hiring for manufacturing and logistics operations, reinforced by cross-border trade flows and ongoing industry collaboration initiatives (e.g., the region's electronics manufacturing cluster)

704,767
population

~1,249 working-
age population
(5 km radius)
